

Be Prepared: Tile Backsplash

Once overlooked and thought of purely for function, the backsplash is now regarded as one of the most important design elements in a kitchen, bar, or bathroom. The eye is immediately drawn to the space between the countertop and cabinets. SPLASH offers a multitude of tiles, stones, mosaics, medallions, accents, and trims to make the most of your backsplash. More importantly, we offer the expertise to execute patterns, blends, colors, and designs with confidence allowing your ideas to shine.

Make an appointment to meet with a tile specialist

To your appointment please bring your elevation drawings or hand drawings of backsplash areas with accurate measurements. We also suggest bringing cabinet and countertop samples, flooring sample or photos, and anything else which will aid in backsplash color/material selection (faucet, hardware, and lighting styles & finishes).

Photos of styles you like are very helpful in narrowing down the selection and creating a design that is perfect for you!

Our selection includes ceramic tile, porcelain, mosaics, blends, natural stone, glass, medallions, trims, waterjet designs, inlays, frames & borders, and custom designs in every material and style imaginable. Our goal is to exceed your expectations and help you achieve the best look possible. We love what we do and look forward to sharing our passion for the details with you!
