Be Prepared: Cabinet Hardware

•New Cabinets / No Holes Drilled•

•You will have many terrific options!

If possible bring a sample or photo of anything you are trying to coordinate your hardware with. Faucet finish, cabinet sample, countertop – these all help in pulling *your* look together with hardware.

•Replacing Existing Hardware / Holes Drilled•

•Do you have single holes for knobs, 2 holes for pulls, or a combination of both?

If you are painting or staining your cabinets we strongly recommend filling in your existing holes. This will give you many more hardware choices and maximize your makeover efforts!

•Make an appointment to meet with a hardware specialist•

•To your appointment please bring your elevation drawings that show the layout of the cabinetry. We will use these to determine sizes, quantity and placement of hardware. When your order is complete you will receive a copy to aid in installation of hardware.

•To your appointment please bring a cabinet door or drawer with existing hardware installed. This allows for an accurate measurement of the size required and to see how new options look on *your* cabinets.

***Please know if your appliances are paneled and require grips to match your hardware.**

***Don't Forget to Count how many you need!**

_____ Knobs _____ Pulls

or

_____ Cabinets _____ Drawers

We love what we do and look forward to sharing our passion for the details with you!
Our goal is to exceed your expectations and help you achieve the best function and look possible.
